

The SafeStop Bus App is Now Available for D65 Schools!

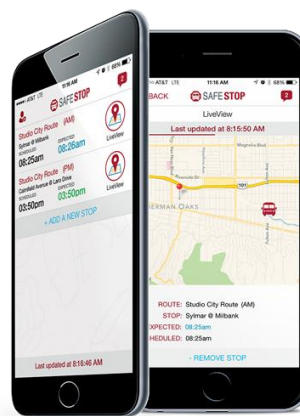

SafeStop is the mobile app that connects parents to the vehicles transporting their children

Why Register For SafeStop?

SafeStop is a **FREE**, easy-to-use mobile app that allows you to monitor the status of your child's school bus in real-time. We hope the new SafeStop App will provide our families with an easy and convenient way to monitor the location of their child's school bus.

Available Features:

- A real-time map to locate your child's bus
- Estimated Arrival Times for the bus at your stop
- An Alerts & Messaging area letting you know of any updates or changes to service
- A secure registration process that ensures only parents and school officials have access to this information

How to Sign Up:

Visit **Evanston65.SafeStopApp.com/activate** to register or you can visit www.SafeStopApp.com and look up your school district using your home's zip code.

To securely register, you must enter your student's ID Number. You can enter multiple student IDs on the second page of the registration form if you have children who ride different buses to and from school. If you do not know your student's ID number, this information can be found in the SISK12 parent portal. If you believe you entered your student's ID correctly but receive an error message, you will be prompted to fill out a short form and a member of the SafeStop team will contact you directly to get any problems resolved.

Once you register, you will receive a confirmation email with download information for the SafeStop mobile app. Please note that for the first few weeks of service, only the LiveView Bus Locator and Alerts & Messaging features will be available. Estimated Arrival Times will be available in the app shortly thereafter!

If you have any questions about the signup process or use of the app, please contact support@SafeStopApp.com. We look forward to having you on-board!
