Science + Technology + Engineering + Math = 1 Exceptional Program

The Wildkit Engineering Summer Camp utilizes a project-based, hands-on and real-world problem solving approach to STEM learning (Science, Technology, Engineering, and Mathematics) that's designed to nurture kids' imaginations, inspire creativity and develop self-confidence. The camp is based on the national Project Lead the Way (PLTW) pre-engineering program and is facilitated by ETHS PLTW faculty members.

Campers solve engineering challenges such as:

- **Creating a spacecraft strong and light enough to land an "eggstronaut" safely**
- **Making a MAGLEV Car**
- **Designing a hot air balloon**
- **Soldering a circuit board**
- **Programming a robotic arm to move objects**
- **Designing, building, and testing a rocket for maximum altitude and a perfect landing, using 3D modeling software and 3D printing**
- **Turning raw materials into wearable jewelry prototypes, using sketching and modeling software**

Cost and Registration — Complete the registration form below and return it with the \$75 camp fee.

Location — The camp is held at Evanston Township High School, 1600 Dodge Avenue, Evanston, IL — Room A-156

Drop Off — Campers will enter and exit through Door #31 (Bacon Entrance—back of the school). Teachers will meet campers and escort them to and from the classroom.

Fee Waiver — A limited number of fee waivers are available for families in need of financial assistance. (Check box on form and you will be contacted regarding your request.)

Refund Policy — Registration fees are non-refundable once camp has begun. If the camp has a low enrollment it will be cancelled and a full refund will be issued.
